ISSN 0039-6028

surface science

A journal devoted to the physics and chemistry of interfaces

North-Holland–Amsterdam

ADVISORY EDITORIAL BOARD

CANADA:	P.R. Norton, *London, Ontario*
CHINA:	Xie Xide, *Shanghai*
FRANCE:	L. Dobrzynski, *Villeneuve d'Ascq*
GERMANY:	E. Bauer, *Clausthal–Zellerfeld*, G. Comsa, *Jülich*, D. Menzel, *Garching bei München*
JAPAN:	Shinji Kawaji, *Tokyo*
THE NETHERLANDS:	J.F. van der Veen, *Amsterdam*
UK:	T.B. Grimley, *Liverpool*, R.M. Lambert, *Cambridge*, M.W. Roberts, *Cardiff*
USA:	J.E. Demuth, *Yorktown Heights, NY*, C.B. Duke, *Richland, WA*, P.J. Feibelman, *Albuquerque, NM*, T.E. Madey, *Piscataway, NJ*, J.M. White, *Austin, TX*, R.F. Willis, *University Park, PA*, J.T. Yates, Jr., *Pittsburgh, PA*

EDITORIAL ADDRESSES:

Editor:
Professor Harry C. Gatos, Bldg. 13, Massachusetts Institute of Technology, Cambridge, MA 02139, USA

Regional Editors:
Professor G. Comsa, Institut für Grenzflächenforschung und Vakuumphysik der Kernforschungsanlage Jülich GmbH, Postfach 1913, D-5170 Jülich 1, Fed. Rep. of Germany
Professor Shinji Kawaji, Department of Physics, Gakushuin University, 1-5-1 Mejiro, Toshima-ku, Tokyo 171, Japan
Dr. R.M. Lambert, Department of Chemistry, University of Cambridge, Lensfield Road, Cambridge CB2 1EP, UK

Contributions must be written in English. They should be submitted in triplicate with original drawings of the figures (no larger than ca. 20×30 cm) and an abstract in English.
All manuscripts, other than Letters, originating in the Federal Republic of Germany, the German Democratic Republic and Austria, should be submitted to the Regional Editor in Germany.
All manuscripts, other than Letters, originating in European Countries, other than those mentioned above, as well as those originating in Africa, should be submitted to the Regional Editor in the UK.
All manuscripts, other than Letters, originating in Japan, should be submitted to the Regional Editor in Japan.
All manuscripts originating in North and South America, in Asia (except Japan), in Australia or New Zealand, should be submitted to the Editor.

The authors are encouraged to list the names (and addresses) of three to four individuals who are qualified to serve as referees for their paper. The proposed referees should preferably (but not necessarily) reside in the same country or continent as the editor or regional editor to whom the paper is submitted. The referees selected will not necessarily be from the list suggested by the author.

All Surface Science Letters regardless of country of origin, should be submitted directly to the Editor.

Surface Science is published in semi-monthly issues. For 1989, 16 volumes have been announced. The subscription price for these volumes is Dfl. 6000.00 (US$ 2752). Postage and handling amount to Dfl. 432.00 (US$ 198). Therefore the total price is Dfl. 6432.00 (US$ 2950). The price for a combined subscription to the 1989 volumes of Surface Science, Applied Surface Science and Surface Science Reports is Dfl. 7836.00 (US$ 3594), including postage and handling. The Dutch guilder prices are definitive; the currency equivalents are for your guidance only.
Subscriptions should be sent to the publisher, Elsevier Science Publishers B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam, or to any subscription agent or bookseller. Claims for issues not received should be made within three months of publication. If not, they cannot be honoured free of charge.
Books for review should be sent to Professor H.C. Gatos.

(North-Holland Physics Publishing Division), P.O. Box 103, 1000 AC Amsterdam, The Netherlands.
Special regulations for authors – Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.
Submission to this journal of an article entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.
Special regulations for readers in the USA – This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US$ 2.25, also payable through the Center. (N.B. For review journals this fee is US$ 0.20 per copy per page.) This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Although all advertising material is expected to conform to ethical standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

This issue is printed on acid-free paper.

High T_c Superconductors

Preparation and Application

Proceedings of Symposium A, E - MRS Fall Conference,
Strasbourg, France, 8-10 November, 1988

P.F. Bongers, C. Schlenker *and* **B. Stritzker** *(editors)*

Repr. from Journal of the Less Common Metals, Vols. 150 & 151

(European Materials Research Society Symposia Proceedings, 6)

The papers in this two volume set provide the latest information on research and development in the field of high T_c-materials. Special emphasis is placed on methods of preparation and microstructural characterization for both thin films and single crystals. Considerable attention is also paid to the potential applications of thin films and bulk materials. The following topics are covered in detail: New superconductors; Relations between structure and/or substitution and superconductivity in ternary Cu-oxides; Single crystals, microstructure; Thin films, preparation and properties; Technical applications.

A Selection of Contents: **Vol. I. 1. General Theory.** Unconventional superconducting properties of the High T_c oxides *(G. Deutscher)*. Understanding high temperature superconducting oxides *(B.K. Chakraverty et al.)*. Raman scattering as an analytical tool for high T_c superconductors *(C. Thomsen et al.)*. **2. Structure, New Materials and Substitution.** Structures and microstructures in the bismuth and thallium superconductors *(M. Hervieu et al.)*. Electron microscopic studies of high T_c superconductors *(S. Amelinckx et al.)*. Structure and conductivity of copper oxide based compounds *(D.M. de Leeuw)*. Order-disorder and superconductivity in Tl-Ba-Cu-O and lead-substituted Bi-Sr-Ca-Cu-O compounds *(P. Bordet et al.)*. A homologous series based on $YBaCuO,Ba_{16}Y_2Cu_{24}C_{56-m}(0<m<8, m$ even) *(M.A. Alario-Franco et al.)*. Two new bulk superconducting phases in the Y-Ba-Cu-O system: $YBa_2Cu_{3.5}O_{7-\delta}(T_c=40K)$ and $YBa_2Cu_4O_{8+x}(T_c=80$ K) *(J. Karpinski et al.)*. Characterization of bulk superconducting high-temperature ceramics by very low field a.c. initial susceptibility *(B. Loegel et al.)*. High-pressure phase diagrams (1 . 3000 bar oxygen) of the (Y-Ba-Cu-O)-O_2systems *(J. Karpinski et al.)*. Reproducible growth of large free crystals of $YBa_2Cu_3O_{7-x}$ *(W. Sadowski, H.J. Scheel)*. Crystal fibers of Bi-Sr-Ca-Cu-O materials grown by the laser floating zone method *(G.F. de la Fuente et al.)*. High T_c phase stabilization in Bi-Ca-Sr-Cu-O systems by lead doping *(N. Brnicevic et al.)*. Preparation of superconductors of the BiSrCaCuO system by glass crystallization *(A.P. Concalves et al.)*. **Vol. II. 3. Physical Properties.** The breaking torque concept in a sintered LaSrCuO sample *(L. Fruchter et al.)*. Critical currents and magnetic relaxation of epitaxial $YBa_2Cu_8O_{7-h}$ films *(R. Griessen et al.)*. **4. Materials, Single Crystals, Phase Diagrams.** Crystal growth of oxide superconductors *(H.J. Scheel)*. **5. Thin Films.** Direct production and properties of sputtered epitaxial $YBa_2Cu_3O_7$ thin and ultrathin films on (100) and (110) $SrTiO_3$ *(H. Schubert et al.)*. **6. Applications.** The development of SQUID magnetometers using bulk ceramic superconductors *(C.E. Gough et al.)*. Author Index. Subject Index.

Photochemistry on Solid Surfaces

edited by **M. Anpo,** *University of Osaka Prefecture, and*
T. Matsuura, *Kyoto University, Japan*

(Studies in Surface Science and Catalysis, 47)

The latest developments in photochemistry on solid surfaces, i.e. photochemistry in heterogeneous systems, including liquid crystallines, are brought together for the first time in a single volume. Distinguished photochemists from various fields have contributed to the book which covers a number of important applications: molecular photo-devices for supermemory, photochemical vapor deposition to produce thin-layered electronic semiconducting materials, sensitive optical media, the control of photochemical reactions pathways, etc. Photochemistry on solid surfaces is now a major field and this book which provides an up-to-date and comprehensive overview of the subject will be of interest to a wide range of readers.

CONTENTS: 1. Introduction. 2. Photochemical Techniques to Understand Photochemical and Photophysical Features on Solid Surfaces. 3. Specific Features of Photochemical Reactions on Solid Surfaces. 4. New Developments of Organic Photochemistry on Solid Surfaces. 5. New Developments of Inorganic Photochemistry on Solid Surfaces. 6. Laser Induced Photoreactions and Photo-CVD on Solid Surfaces. 7. Topics of Photochemistry on Semiconducting Materials. 8. Applications of Photochemistry to Optical Media. 9. Recent Developments of Photochemistry in Liquid Crystals and Proteins. Subject Index.

INSTRUCTIONS TO CONTRIBUTORS TO SURFACE SCIENCE

Contributions must be written in English. **They should be submitted in triplicate with original drawings of the figures** (no larger than ca. 20×30 cm) and an abstract in English. All manuscripts other than Letters, originating in the Federal Republic of Germany, the Democratic Republic of Germany and Austria, should be submitted to the Regional Editor in Germany. All manuscripts, other than Letters, originating in European Countries, other than those mentioned above, as well as those originating in Africa, should be submitted to the Regional Editor in the UK. All manuscripts, other than Letters, originating in Japan, should be submitted to the Regional Editor in Japan. All manuscripts originating in North and South America, in Asia (except Japan), in Australia or New Zealand, should be submitted to the Editor. **All Surface Science Letters regardless of country of origin, should be submitted directly to the Editor.**
The authors are encouraged to list the names (and addresses) of three to four individuals who are qualified to serve as referees for their paper. The proposed referees should preferably (but not necessarily) reside in the same country or continent as the editor or regional editor to whom the paper is submitted. The referees selected will not necessarily be from the list suggested by the author.
The submission of a paper will be taken to imply that the author has satisfied himself that no copyright will thereby be infringed. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Rapid publication: To qualify for rapid publication in **Surface Science Letters** manuscripts should not exceed 2000 words in length, excluding the abstract, list of references and a maximum of 5 tables or figures which will be counted as separate.

Manuscripts should be typed, double spaced, with wide margins. Original copies (or clear xerographic copies) are needed for the printer.
Vectors will be printed in bold-face italics (heavy, slanting type), and should be indicated by a wavy underlining in the typescript. No other symbols should be underlined. Special attention should be paid to characters which can easily be misread, such as i (lower case), I (cap.), l (el), 1 (one), ′ (prime), o (lower case), O (cap.), 0 (zero), u, v (lower case), ν (Greek nu), V (cap.), s, S, x, X, ×, p, P, ρ (Greek rho), etc. If necessary, unusual symbols should be explained in pencil in the margin.

Displayed formulae should be numbered and typed.

Each table should be typed on a separate sheet, and should have a title in addition to its serial number.

Line drawings for the figures should be originals, drawn in black India ink and carefully lettered (with the use of stencils). The lettering as well as the details should have proportionate dimensions so as not to become illegible or unclear after the usual reduction in printing; in general, the figures should be designed for reduction by a factor of two to three. Glossy prints can be accepted only if they are of good quality.

Photographs should be unmounted, unless they form part of a composite figure, and somewhat more contrasty than is desired in the printed version. Where necessary the top edge should be identified on the back. Original ink drawings and photographs will be returned after publication of the paper.

Colour printing: Illustrations may be considered for colour printing where the use of colours is essential. The decision on this rests with the Editor. The Publisher and the Author will each bear part of the extra costs involved. Standard rates apply for printing costs and figure processing costs. These rates are obtainable from the Editor.

Figure captions: Each figure should have a number and a caption. Captions should be typed on a separate sheet.

References to other papers should be consecutively numbered in the text: "Pendry et al. [1] have shown ..." and listed at the end of the typescript as in the following examples:
[1] J.B. Pendry, K. Heinz, W. Oed, H. Landskron, K. Müller and G. Schmidtlein, Surface Sci. 193 (1988) L1.
[2] R.M.A. Azzam and N.M. Bashara, Ellipsometry and Polarized Light (North-Holland, Amsterdam, 1976).
[3] G. Heiland and H. Lüth, in: The Chemical Physics of Solid Surfaces and Heterogeneous Catalysis, Vol. 3B, Eds. D.A. King and D.P. Woodruff (Elsevier, Amsterdam, 1984) ch. 4.
References to unpublished or not readily accessible reports should be avoided.

Footnotes should be avoided as much as possible.

Corrections in the proofs should be limited to printer's errors; the authors may be charged for any other changes in the proofs.

Page charge and reprints: There is no page charge. Reprints may be ordered from the publisher. An order form will be sent to contributors together with the proofs. 25 reprints of the article will be supplied free of charge.
